as at 1.4.63 = £313,628.

Acreage. = 1,420 acres.

Preface to the Report

District Health Office  
County Health Department  
Merlins Hill  
Haverfordwest.

July, 1963.

To:- His Worship The Mayor,  
Aldermen & Members of the  
Haverfordwest Borough Council

Mr Mayor and Gentlemen,

I have pleasure in presenting the Annual Report for the year 1962. Details will be found in the body of the Report. The main items may be summarised as follows:-

Population.

The estimated population for 1962 again showed a small rise. Population for the Borough has increased approximately 18% since 1947.

Births. The Birth-Rate was not so high as in the previous year, but is still considerably higher than the National Rate. There was an increase in the number of Illegitimate Births, but a welcome decrease in the number of Still Births.

Deaths. The General Death Rate showed a slight decrease over the preceding year, but is somewhat higher than the National Rate. The number of Infant Deaths recorded was the highest over the past 16 years. This also applies to the deaths from Cancer. On the other hand, there was a decrease in the number of Violent and Accidental Deaths, and the Tuberculosis Mortality was nil for the tenth successive year.

Infectious Disease.

Apart from three cases of Tuberculosis, there were no other Infectious Diseases notified in the Borough during 1962.

Water Supply.

Water supply was satisfactory, both in regard to quantity & quality. The upward trend in the consumption or use of water continues and has more than doubled over the past 12 years. The control of Water supplies passed on 1st Dec, 1962 to the Pembrokeshire Water Board.

Housing. The Council's Housing Programme has passed the 1000 mark. There are still, however, over 400 applicants for Council re-housing. To meet this demand another two to three hundred housing units will be necessary over the next two years. There is a steady flow of Improvement Grants, but one feels that this aspect could be on a much higher scale in the Borough.

Food Hygiene.

The absence of food-poisoning, and the rarity of complaints, reflects the reasonably high standard of food hygiene in the Borough. The Public Health Staff endeavour at all times to implement the Food Hygiene Regulations.

Meat Inspection. The number of animals killed & examined remained relatively the same as the preceding year (20,000).  
0.5% of all animals killed were Tuberculin Re-actors.  
The facilities at the present Slaughter-house for complying with Hygiene & other Regulations have been inadequate for some time. Extensive improvements at the present Slaughter-house, or the provision of new premises, is overdue.

General Sanitation and Hygiene. Apart from the completion of the new Sewerage Scheme, there is no major sanitary problem in the Borough.  
Complaints of fouling of Public conveniences are fairly common, especially in the holiday season. It is difficult to know how to cope with this problem. But it could be eased by more frequent inspections & cleansing.

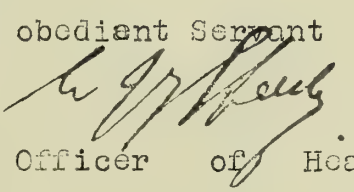

Office Accommodation. There has been no improvement in the working conditions of some departments of the Council over the past year.  
The conditions in the basement of 2 Picton Place are unsatisfactory & detrimental.

Conclusion. I should like to pay tribute to the Chief Public Health Inspector and his Assistant for the efficient day-to-day running of the Health Department. Also on behalf of them & myself to the co-operation given by other Departments of the Council.

I thank all members of the Council for their continued courtesy & consideration.

I remain,

Your obedient Servant

  
Medical Officer of Health.

=====

PART I. VITAL STATISTICS AND EPIDEMIOLOGY

Summary of Vital Statistics

Estimated Mid-year Population	=	8,710
General Death Rate	=	13.0/1000 population
General Birth Rate	=	20.3/1000 population
Cancer Death Rate	=	3.3/1000 population
Infant Mortality Rate	=	50.0/1000 Live Births.
Tuberculosis Death Rate	=	Nil.

=====

WATER SUPPLIES.Sources of Supply.1. Prescelly.

The Prescelly gathering grounds and impounding Reservoir (Capacity - 160,000,000) gallons, are situated in North East Pembrokeshire. As a constituent member of the Prescelly Water Board, the Borough has an allocation from this source. The allocation is 600,000 gallons per day. This water is a typical upland surface water, being soft and somewhat acid. It is relatively free from pollution, and passes through a modern filtration and chlorination plant before entering the main trunk. The Chemical and Bacteriological conditions of the water is controlled at source by routine sampling, (organised by the Engineer of the Prescelly Water Board).

2. Crowhill.

This is a shallow well on the Western bank of the Western Cleddau, situated approximately one mile from the Borough. The supply is fluctuating, but the average 91,000 gallons per day can be provided from this source. The supply is used as an auxiliary to augment the main supply.

Water Sampling.

General bacteriological sampling, particularly of consumer supplies, was continued during the year. Samples forwarded to Public Health Laboratory, Carmarthen, for testing & report.

The following is a summary of sampling results:-

	Consumer level.	Source.	Total.
Satisfactory	40	4	44
Doubtful	0	0	0
Unsatisfactory	2	0	2
Total	42	4	46

No chemical samples during the year from source.

One sample was taken from a consumer's storage tank following complaint of stomach disorders. Nothing abnormal was detected in this sample.

General Statistics.

Average daily consumption during 1962	=	505,000 gallons
" " " per head population.	=	59 "
No. of new premises connected during 1962	=	32
No. of renewals of old premises " "	=	16
% premises in Borough on piped water supply.	=	99.8%

Comparative Table of Water Consumption.

		Average Daily consumption
1948	=	280,000 gallons
1949	=	311,550 "
1952	=	324,300 "
1954	=	436,000 "
1958	=	438,000 "
1959	=	425,000 "
1961	=	518,000 "
1962	=	505,000 "

The Council's responsibility as a Water undertaking passed to the Pembrokeshire Water Board on 1st Dec. 1962. Water supply in the Borough can be considered satisfactory both as regards to quantity & quality.

## HOUSING

### Council Housing Programme.

No. of new Housing units completed in 1962	=	10
No. of new Housing units to be completed in 1963	=	21

### Summary of Council Housing.

Pre 1945	=	248 units.

Food Poisoning

Nil to report during the year 1962.

Registered Premises.

The following premises are registered under the Food & Drugs Acts.

Ice - Cream Premises.	=	53
Prepared food Premises.	=	19
Dairies.	=	Nil
Slaughterhouses.	=	12
Knacker Yards.	=	Nil

Milk.

No. of Producers only	=	Nil
No. of Producers/Retailers.	=	Nil
No. Retailers only	=	16

The general bacteriological sampling of milk is carried out by the Pembrokeshire County Council.

Two (2) samples of milk were taken for biological sampling, for brucellosis. Both proved to be satisfactory.

ICE-CREAM.

Summary of Producers & vendors in the Borough.

Producers.	=	1
Retailers:-		
Locally produced	=	2
Lyons	=	21
Walls	=	26
Eldorado	=	3
	Total	= 53

Four (4) new registrations for the sale of Ice-Cream were approved during the year.

Sampling of Ice-Cream.

General bacteriological sampling of Ice-Cream was continued. Samples forwarded to the Public Health Laboratory, Carmarthen, for testing & report.

The following is a summary of sampling results for 1962:-

		<u>Retailer.</u>	<u>Producer.</u>	<u>Total</u>
Grade I (Highly Satisfactory)	=	99	3	102
Grade II(Satisfactory)	=	5	0	5
Grade III(Doubtful)	=	0	0	0
Grade IV(Unsatisfactory)	=	0	1	1
Total	=	104	4	108

biol

The hygienic standard of Ice-Cream offered to the public is considered to be satisfactory.

# Unfit & Unsound Foods.

1961 ..	20,915	..	105	90	650
1962 ..	20,594	..	115	65	718

To comply with the Slaughterhouse Regulations, the present Slaughterhouse requires extensive structural alterations and improvements.

As an alternative to this the Council is considering acquiring a new site & constructing a new Slaughterhouse.

A final decision, one way or the other, is urgently required.

Inspection.

All animals killed at the Slaughterhouse are examined post-mortem. Both Public Health Inspectors are qualified Meat Inspectors.

=====

Refuse Collection & Disposal.

Twice weekly collection within the Borough. The standard of household bins has improved considerably, but could still be better.

Refuse is tipped on the Priory Saltings. When earth or building waste is available the refuse is covered. This however, tends to be spasmodic.

The tipping face is treated routinely for fly & rodent infestation. Despite this numerous complaints are received regarding fly nuisance. This is a serious hygienic problem as, in addition to housing estates, the Hospital is in the near vicinity.

General Nuisances.

Disinfestations      The following premises were treated:-

Ants	..	57	premises.
Cockroaches	..	7	"
Bees	..	1	"
Fleas	..	1	"

Disinfection.

One house was disinfected by request.

Dirty Air.      One Council house tenant complained of harmful atmosphere in living room due to defective grate. A sample of air from the room failed to reveal any harmful element.

Pigeons

Several complaints from the centre of the Borough were received regarding the roosting of pigeons, with subsequent fouling of buildings & pavements.

Application to the Ministry to narcotise the pigeons was not granted.

Pet Shops.

One in the Borough, well maintained. No complaints.

Itinerants & Moveable Dwellings.

Several complaints in respect of caravan dwellers received & particularly in the Merlin's Bridge area.

A controlled site for itinerants in the area is urgently required.

Dumping of Refuse.

There is still a fair amount of indiscriminate dumping of refuse & rubbish, particularly in the river or on the river banks. This is a most un-hygienic practice, as well as detracting from the amenities of the Borough.

Noise Abatement.

Complaints received regarding chiming by Ice-Cream vendors. Warning letters sent.

Defective Drains.

Twenty eight (28) defective drains were examined during the year. All defects remedied by informal notice.

=====

### Flooded basements.

Several cases of flooding arose, mostly due to exceptionally high tides. In some instances a defective water main was the cause.

### Mortuaries.

The Mortuary is situated on St Thomas Green, and is jointly controlled by the Borough and the Haverfordwest Rural District Council.

The building is old and cramped, and is of use for the accommodation of a dead body only. There are no facilities for post-mortem examination.

### Public Conveniences.

The Borough is reasonably well provided with conveniences. Unfortunately they are abused by some sections of the public, and complaints of uncleanness are common. also damage to fittings occur frequently.

It is practically impossible to guarantee a high standard of cleanliness in a public convenience, unless there is a full-time attendant.

### Sewage Disposal.

The sewerage system in the lower part of the Borough is old and inefficient. This applies particularly to the disposal, which is crude, into the river.

The Council recognises that this is prejudicial to health, and to amenity. A new scheme for sewerage & disposal has been approved at a cost of approximately £260,000.

Whilst this will be a heavy burden on the rate-payer, the advantages will outweigh the financial hardship.

### Rodent Control.

The following is a summary of rodent control during the year:-

Place.	Surveys.	Mice.	Treatments		Total
			Rats.		
Private Houses.	1,450	111	62		173
